Tech Jobs Connect

Tech Jobs Connect is a fictional online recruitment platform established to bridge the gap between technology professionals and employers. The platform focuses on connecting software developers, web designers, cybersecurity specialists, network engineers, data analysts, and other IT professionals with companies seeking skilled employees. As the technology industry continues to grow, many organisations struggle to find qualified candidates while job seekers often find it difficult to discover suitable opportunities. Tech Jobs Connect aims to simplify this process through a modern, user-friendly website.

Mission and vision statements.

To connect talented technology professionals with employers through an efficient, accessible, and reliable online recruitment platform.

Vision Statement

To become the preferred online technology recruitment platform that empowers job seekers and employers across South Africa and beyond.

Target Audience

- IT students and graduates
- Software developers
- Web developers
- Cybersecurity professionals
- Data analysts
- IT companies and employers

Website Goals and Objectives:

The website aims to:

- Help employers advertise technology vacancies.
- Allow job seekers to browse available jobs.
- Increase registrations from job seekers.
- Improve communication between employers and applicants.
- Provide career-related information and resources.

Key Performance Indicators (KPIs)

- 500 registered users within six months.
- At least 100 active job advertisements.
- 1,000 monthly website visitors.
- At least 100 job applications per month.
- Website uptime of at least 95%.

Current Website Analysis

Tech Jobs Connect is a fictional organisation created for this website project and does not currently have an established website. Therefore, there is no existing website to evaluate for strengths and weaknesses. The proposed project will create the organisation's first website, giving the organisation an opportunity to develop a professional online presence from the beginning.

The main areas that need to be considered are:

- **Online visibility:** The website should make Tech Jobs Connect easier for job seekers and employers to find online.
- **Job search:** Users should be able to search and filter technology vacancies quickly.
- **User experience:** The website should have simple navigation and a clear application process.
- **Mobile accessibility:** The website should work effectively on smartphones, tablets and computers.
- **Regular updates:** New vacancies and career information should be updated regularly.
- **Security:** User registration and application information should be protected.

The proposed website will address these requirements through a responsive design, organised job categories, search and filtering functions, user accounts, secure forms and regularly updated content. This approach will allow Tech Jobs Connect to establish a professional digital presence while providing a convenient platform for connecting technology employers and job seekers.

Proposed Website Features and Functionality

The Tech Jobs Connect website will be designed to provide a simple and professional platform where job seekers can find technology-related employment opportunities and employers can advertise vacancies. The website will be responsive so that it can be accessed on computers, tablets and smartphones.

Main Website Features

- **Home Page:** Introduces Tech Jobs Connect and provides quick access to job searches and important website sections.
- **Job Listings:** Displays available technology vacancies with information such as job title, company, location, salary and closing date.
- **Search and Filter:** Allows users to search for jobs using keywords, location, job category, experience level and employment type.
- **Job Details Page:** Provides detailed information about each vacancy and includes an **Apply Now** button.
- **Job Seeker Registration:** Allows users to create an account, build a profile and upload their CV.
- **Employer Registration:** Allows companies to create accounts and advertise available positions.
- **Career Tips:** Provides useful information about CV writing, interviews, skills development and starting a career in IT.
- **About Us:** Explains the purpose, mission and vision of Tech Jobs Connect.
- **Contact Us:** Provides contact details and an online enquiry form.
- **FAQ Page:** Answers common questions about registration, applications and posting vacancies.

Proposed Functionality

The website will allow registered users to save jobs, apply for vacancies and manage their profiles. Employers will be able to post, edit and remove job advertisements. The system will also provide clear navigation and responsive pages to ensure that users can easily access the website from different devices.

The Tech Jobs Connect website will have a **modern, professional and user-friendly design** that reflects the technology and employment industry. The focus will be to make it easy for job seekers to find suitable vacancies and for employers to advertise available positions.

Colour Scheme

The proposed colour palette will consist of:

- **Dark Blue (#003366):** Represents professionalism, trust and technology.
- **Bright Blue (#1976D2):** Used for buttons, links and important actions.
- **White (#FFFFFF):** Keeps the website clean and easy to read.
- **Light Grey (#F4F6F8):** Used for backgrounds and content sections.

Typography

- **Poppins Bold:** Main headings.
- **Poppins Semibold:** Subheadings and important labels.
- **Aptos 11:** Body text to maintain consistency with the project requirements.

Layout and Design

Timeline and Milestones

Week1	Research and proposal
Week2	Wireframes and visual design
Week3	HTML development
Week4	CSS styling
Week5	JavaScript functionality
Week6	Testing and debugging
Week7	Final improvements
Week8	Final submission

BUDGET

ITEM	Estimated costs
DOMAIN (. CO.ZA) C	R100/YEAR
HOSTING	R1,200/YEAR
SSL	INCLUDED / R0
DESIGN AND DEVELOPMENT	R15,000
TESTING AND OPTIMIZATION	R2,000
MAINTENANCE	R500/MONTH
ESTIMATED FIRST-YEAR TOTAL
